

siRNA transfection in MCF-7 breast carcinoma cells

Order #:
[VB-01LB-01](#) or [VB-01LB-03](#)

Fig. 1: Knockdown of control and target gene in MCF-7, HCT116 and U2OS cells transfected with Viromer® BLUE

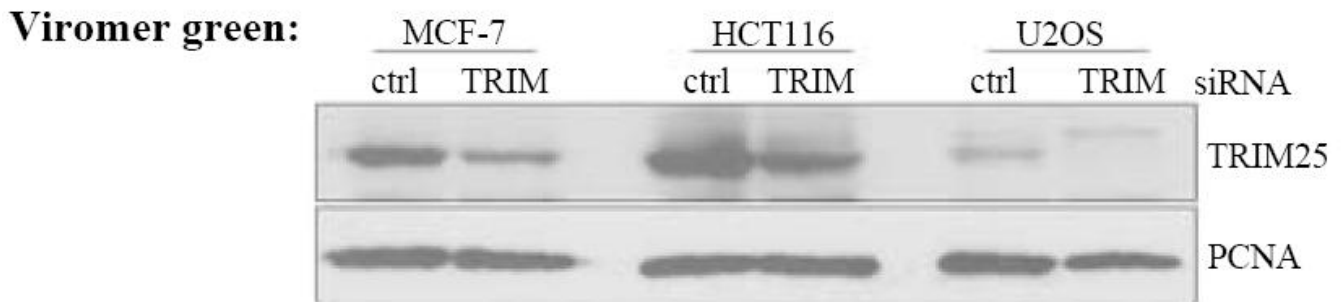

Fig. 2: Knockdown of control and target gene in MCF-7, HCT116 and U2OS cells transfected with Viromer® GREEN

Transfection of MCF-7 cells with with Viromer® BLUE or GREEN

- standard protocol
- MCF-7 and HCT116 cells express much Trim25
- significant knockdown of Trim25 expression with Viromer® BLUE and GREEN
- almost complete knockdown of Trim25 in U2OS cells
